EarthCube Research Coordination Network Grant - What About Model Data?

Draft Virtual Workshop Agenda: Workshop #1, Boulder, CO, May 5-7, 2020, **Times in MDT.**

Primary Goal: Develop initial set of model descriptors and descriptor rankings.
Needs: model descriptors, ranking categories
Breaks: Breaks will be provided as the need arises during each session.

Day 1: Tuesday, 5 May, 9:00 - 12:00 MDT
Join Hangouts Meet

8:30-9:00: Virtual coffee to test remote connection effectiveness and work out tech bugs.
9:00-9:30: Welcome, Workshop Goals and Expectations, Agenda Review, Logistics, How to ask questions, Tech Information.
9:30-11:30: Current Requirements and Strategies in Model Storage and Reproducibility
- The goal of this session is to describe the state-of-the-science in current requirements and practices.

Presenter Name	Organization/role	Title
Bryan Lawrence ~9:30	UK NCAS: Director of the Models and Data Division	When should a simulation be FAIR?
Sheri Mickelson ~9:45	Software Engineer, NCAR/CISL	CESM's New Data Workflow for CMIP6
James Stagge ~10:00	Ohio State University: Assistant Prof, Civil Eng/Hydrologist.	Minor adjustments, major benefits: Assessing reproducibility in hydrology research
Pat Hogan ~10:15	Oceanographic Sciences Branch (OSB) Chief, NCEI	Best Practices for Model/Data Preservation at NOAA/NCEI
Mike Friedman ~10:30	AMS publications: Senior Manager of Publishing Operations	Model Data and Publishers: The View from AMS
Brian Gross ~10:45	NOAA/NCEP	Moving to Community Modeling In the National

		Weather Service

- Discuss importance of defining terms: e.g., reproducibility
- Acknowledging adjacent issues: e.g., sharing, where to store, who pays for it

11:30-12:00 Open Discussion

Day 2: Wednesday, 6 May, 9:00 - 12:00 MDT
Join Hangouts Meet

9:00- 9:30 Review themes from day one and provide guidance for breakout groups
9:30-11:15 Breakout #1: Model Descriptor Brainstorming
- Breakout Sessions have 8-10 people, 5 groups
  - Separate Google invite for each breakout session.
- Model Descriptors should have a) definitions, and b) a "keep" and "don't keep" scores (i.e., what is the range of models under that descriptor)

11:15-12:00 Reports from breakouts and open discussion
12:00-12:45 Leaders only: Work on combining Day 2 lists into one document

Day 3: Thursday, 7 May, 9:00 - 12:00 MDT
Join Hangouts Meet

https://meet.google.com/aqz-qbqf-hch

Join by phone

9:00-9:30: Discussion: Review/discuss combined model descriptor list and provide guidance for breakout groups
9:30-11:15: Breakout #2: Model Descriptor Prioritization and Ranking categories (e.g. Rank 1,2,3)
- Are these descriptors important for everyone? Only certain subgroups? Can we agree on the top descriptors?
- Goal is to prioritize descriptors and give explanations of the prioritizations
- Can continue to add descriptors as well (this will continue through end of workshop)
- Can develop initial ranking categories (e.g. rank 1,2,3)

11:15-12:00 Reports from breakouts, combine descriptor rankings, and workshop wrap-up

Breakout session organization:

- Separate Google Hangout Breakout for each breakout session -5 breakouts. All participants will receive calendar invites to the Google Hangouts Meet breakout groups that they are assigned to.
- Each Breakout will be coordinated by a leader. Leaders guide discussion, leaders and participants to fill out Google docs and sheets (Google Drive for each workshop). Google media will be accessible for all participants to edit (anyone with the link can edit).
